WAGNER

CABINET PARTS

05/13/2015 2 Part No. W10799552 Rev. A

Wagner 505 paint sprayer manual.

When using this pump with parts that do not comply with the minimum specifications and safety devices of the pump manufacturer, the user assumes all risks and liabilities. Never trigger gun unless tip is in the spray or unclog position. The pump contains arcing parts which emit sparks. Wagner maintains a toll-free help line for you should you have any comments or problems with this Wagner product. •This high pressure airless pump is designed to be used with authorized parts only. The equipment being used, and objects in and around the spray area must be properly grounded to prevent static discharge and sparks. Use more paint hose, not more extension cord. 1 Questions? 2. 7 Optional Hopper Spraying Pressure: A leak is capable of injecting material into the skin. Call us first ...for answers fast... Cylinder of tip forms a stop for the seal (3). •DO NOT use halogenated hydrocarbon solvents. CAUTION Important information that tells how to prevent damage to equipment or how to avoid causes of minor injuries. R 505 HIGH PERFORMANCE AIRLESS SPRAYER OWNER'S MANUAL Easy Does It From Set Up to Clean Up Read Warnings Assemble Cart Attach Tip to Gun Attach Return Hose Attach Paint Hose Prepare to Prime Attach Suction Set Prime Pump Set Pressure Spray Short Term Storage OR Clean Up Maintenance Optional Hopper Accessory PRINTED IN THE U. Toxicity is a concern with some coatings injected directly into the blood stream. ALWAYS engage trigger lock before removing, replacing or cleaning tip. Replace it with another grounded hose. NEVER trigger gun unless tip is completely turned to the spray or unclog position. Insert seal (3) aligning the curve of the seal with the curve of the tip. Shorter extension cords will assure maximum electrical power for proper operation. Cart handle Pail bracket/cart foot Suction set and return tube Spray gun and filter Spray tip and gasket Three bolts, washers and wing nuts 25-foot 3/16-inch higher pressure hose contains the following components: Spare Outlet Spring, P/N 0047485 Spare Tip Seal, P/N 0156713 Return tube fitting, P/N 0088715 Operator's manual ARE LOCATED IN THE LITERATURE SET WITH REGISTRATION CARD General Description The Wagner 505 High Performance Airless Sprayer is a precision power tool used for spraying many types of materials. •WHEN FLUSHING EQUIPMENT use lowest possible pressure. 1.Slide pail bracket (1) onto cart frame and attach with one bolt, washer and wing nut (2). •NEVER use a spray gun which does not have a trigger lock and trigger guard in place and in working order. •Power cord must be connected to a grounded circuit. (See proper grounding instructions.) •Follow the material and solvent manufacturer's safety precautions and warnings. It is a relatively simple machine to operate, however, a basic understanding of its components is necessary. Make sure your extension cord is in good condition. Spray gun safety lock and pressure diffuser; built-in tip safety guard; priming knob for safe pressure release. •ALWAYS lock the gun trigger, shut fluid pump off and release all pressure before servicing, cleaning tip guard, changing tips, or leaving unattended. Portability: When using an extension cord, be sure to use one heavy enough to carry the current your product will draw. NOTE: More than 100 feet of extension cord is not recommended. Power Requirement: •ALWAYS have the tip guard in place while spraying. The paint hose should be inspected before each use. WARNING Important safety information indicates a hazard which may cause serious injury or loss of life. A 14 or 12 gauge cord is recommended. DO NOT come in contact with a fluid stream created by a leak in the fluid hose. Grounded Outlet Grounding Pin (A) Cover of Grounded Outlet Box Adapter Metal Screw (C) (B) Tab for Grounding Screw Figure 2 - Grounding Methods Follow this procedure after the unit is assembled and before any operation which involves the spray gun such as changing tips or accessories, or cleaning and maintenance. Back Cover Components: The shipping carton for your 505 Painting System Cart frame with wheels, motor and pump attached. •Exhaust and fresh air introduction must be provided to keep the air within the spray area free from accumulation of flammable vapors. DO NOT delay treatment to research toxicity. If any of these conditions exist, replace the hose immediately. Safety Features: Never repair a paint hose. •Use only conductive or grounded high pressure fluid hoses for airless applications. •Comply with all appropriate local, state and national codes governing ventilation, fire prevention, and operation. Use two bolts, washers and wing nuts 4 3 (4), tightening securely. (SEE TROUBLE SHOOTING) WARNING DO NOT TREAT AS A SIMPLE CUT! Injection can lead to amputation. Cart Handle 2 Bolt, washer and wing nut 1 Figure 2 - Cart Assembly Diagram Figure 3B - Attaching Cart Handle 1. Figure 7- Attach Tip to Gun NOTE: When attaching tip to gun, align tip guard as shown in Figure 8. •Before each use, check all hoses for cuts, leaks, abrasion or bulging of cover or damage or movement of couplings. Always engage trigger lock before removing, replacing or cleaning tip. Notes: Gives important information which should be given special attention. •Turn ON-OFF switch OFF. An under-sized cord will cause a drop in line voltage resulting in loss of power and overheating. •Avoid all ignition sources such as static electricity sparks, open flames such as pilot lights, hot objects such as cigarettes, and sparks from connecting and disconnecting power cords and working light switches. A 1/3 HP Electric Motor, totally enclosed, fan cooled, Wagner Technical Service 1-800-328-8251 Hours: Weekdays: 8:00 - 4:30 Central Time Weekends: 9:00 - 4:00 Central Time Form No. 0270993-11/93 CONTENTS General Description The green colored rigid ear lug, or the like extending from the adapter must be connected to a permanent ground such as a properly grounded outlet box cover. Gloves will NOT provide protection against an injection injury. Check with a qualified electrician or serviceman if the grounding instructions are not completely understood, or if in doubt as to whether the product is properly grounded. Do not spray without tip guard in place. This bracket helps to keep the sprayer stable in addition to providing a rest for the paint bucket and a catch for the bucket handle. IF AN OVERLOAD OCCURS THE THERMALLY PROTECTED AUTOMATIC RESET DISCONNECTS THE MOTOR FROM THE POWER SUPPLY. WARNING Explosion or fire - Solvent and paint fumes can explode or ignite, causing property damage and or severe injury. Improper installation of the WARNINGgrounding plug can result in a risk of electric shock. ... Replace tip to spray position, (arrow away from gun). Do not modify the plug provided; if it will not fit the outlet, have the proper outlet installed by a qualified electrician. •DO NOT USE BLEACH. •NEVER aim the gun at any part of the body. Compact design, light weight for easy movement. 12-14 Accessories List Pressure Control Knob Hydraulic Pump Priming Knob Paint Hose On/Off Switch Spray Gun Figure 1 - Wagner 505 Airless Spray SAFETY PRECAUTIONS This manual contains information which must be read and understood before using the equipment. NOTE: Sprayer should remain unplugged during assembly. •Halogenated hydrocarbon solvents such as methylene chloride and 1,1,1 - Trichloroethane are not compatible with aluminum and may cause an explosion. 20-22 Extension Cord..... Whenever the adapter is used, it must be held in place by a metal screw. The Prime Spray Valve must be turned to the prime A position to relieve the pressure. A temporary adapter which looks like the adapter illustrated in Figure 2 (B) and (C), may be used to connect this plug to a 2 pole receptacle as shown in Figure 2 (B) if a properly grounded outlet is not available. NOTE TO PHYSICIAN: Injection into the skin is a traumatic injury. CAUTION THIS UNIT IS PROVIDED WITH A THERMALLY PROTECTED AUTOMATIC RESET. 3 4 2 Red Seal 1 Figure 5 - Spray Tip Assembly WARNING POSSIBLE INJECTION HAZARD. This product is equipped with a cord having a grounding wire with an appropriate grounding plug. •DO NOT spray on windy days. 26, 27 Set Up Read and follow this instruction manual carefully for proper operating instructions, maintenance and safety information. The temporary adapter should be used only until a properly grounded outlet as shown in Figure 2 (A) can be installed by a qualified electrician. Simply turning off the electrical power will not release pressure in the system. •Use a respirator or mask whenever there is a chance that vapors may be inhaled. •Motor will restart without warning when protector automatically resets. •In case of skin injection see physician immediately. Turn PRIMING KNOB to PRIME A position. 8 Trouble Shooting Be sure that gun is grounded through hose connections. See Figure 4. 25 Pressure Relief Procedure 3-6 Cleanup and Long Term Shutdown Paint hose can develop leaks from wear, kinking, abuse etc. 15-18 Warranty. Make sure PRESSURE CONTROL KNOB is at its lowest setting (counterclockwise). •NEVER allow any part of the body to come in contact with the fluid stream. 5. It is important to treat the injury surgically as soon as possible. 19 Safety Precautions 15 amp minimum circuit on 115 VAC, 60 HZ current. Capability: 1. •Keep the pump away from spray area to avoid solvent and paint fumes. Insert red seal (4). 28-30 Priming •NEVER put hand in front of the gun. •All accessories must be rated at or above 2500 P.S.I. (Includes spray tips, guns, extensions, and hose). Prime A Trigger Lock Spray B Knob Injection hazard possible. 4. Figure 6 - Spray Tip Assembly 4.Attach spray tip to gun. Figure 8 - Vertical Tip Pattern Then tighten with wrench. 7 Maintenance..... (Flashpoint is the temperature at which a fluid begins giving off a sufficient amount of flammable vapor that could ignite when exposed to a flame or spark.) •High velocity flow of material through equipment may develop static electricity. Hazardous vapors - Paints, solvents, insecticides, and other materials may be harmful if inhaled causing severe nausea, fainting, or poisoning. Up to 2,500 psi. Generator - 15 amp A/C. 3.Check seal alignment by removing tip and inspecting tip guard visually. See Figure 6. 9-11 Parts Lists This product is for use on a nominal 120 volt circuit, and has a grounding plug that looks like plug illustrated in Figure 2 (A) below. •Maximum operating range of the gun - 2500 PSI fluid pressure. Pressure Control Knob 3.Trigger gun to remove any pressure which may still be in the hose. See a physician immediately. Consultation with a plastic surgeon or reconstructive hand surgeon may be advisable. Read all instructions with the mask to insure that it will provide the necessary protection against the inhalation of harmful vapors. Locked Position Unlocked Position Figure 4 - Gun in Locked & Unlocked Position 2.If spray tip is not preassembled, (See Figure 5) insert tip (1) into tip guard, (2) and turn 90° counterclockwise to spray position (arrow pointing away from gun). •Fire extinguishing equipment must be present and in working order. Refer to Cleaning Instructions. Grounding Instructions This product must be grounded. Attach cart handle (3). See Figure 7. See Figure 2 and Figure 3 A. The plug must be plugged into an outlet that is properly installed and grounded in accordance with all local codes and ordinances. •The United States Government Standards have been adopted under Occupational Safety and Health Act. •Always disconnect motor from power supply before working on equipment. When you come to an area which has one of the following symbols, pay particular attention and make certain to heed the safeguard. 23, 24 Grounding Instructions Lock gun trigger in the OFF position. Specifications Weight: Tighten nut first by hand, then tighten with a wrench. The wire with insulation having an outer surface that is green with or without yellow stripes is the grounding wire and must be connected to grounding pin. Sprays a variety of paints, oil base, latex, primers, stains, preservatives and other nonabrasive materials, including pesticides and liquid fertilizers. If needed, remove seal (3) and replace until properly aligned. •Do not spray paints and other inflammable fluids which have a flashpoint below 21° C (70° F). If unsure of a material's compatibility with aluminum, contact your coatings supplier. These standards, particularly the General Standards, Part 1910 and construction Standard, Part 1926, should be consulted. Up to 1/3 gallon (1-1/4 liters) per minute Power Source: •All hoses, swivels, guns, and accessories used with this unit must be pressure rated at or above 2500 PSI. 31 Spraying If repair or replacement of the cord or plug is necessary, do not connect the green grounding wire to either flat blade terminal. Need Help? Do WARNINGnot spray without tip guard in place. •ALWAYS remove spray tip before flushing or cleaning the system. 2 Short Term Storage Face the hose hook toward the front of the unit. Lock gun. Tools needed: Some assembly is required to get your Wagner 505 Airless Sprayer ready to go. The tip guard provides some protection against injection injuries but is mainly a warning device. 27 lbs. General - May cause property damage or severe injury. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. See Figure 3B. CAUTION: THE CAUSE OF THE OVERLOAD SHOULD BE CORRECTED BEFORE RESTARTING. •When thermally protected automatic reset disconnects the motor from the power supply, relieve pressure by turning priming valve to "prime" A. WARNING Explosion hazard incompatible materials - May cause property damage or severe injury. Pail Bracket Bolt, washer and wing nut Figure 3A - Attaching Pail Bracket 2. You will need two adjustable wrenches, a screw driver and a pair of pliers. (12 kg) Capacity: •Read all instructions and safety precautions before operating. Extension Cord Use only a 3-wire extension cord that has a 3-blade grounding plug and a 3-slot receptacle that will accept the plug on the product.

Due to a planned power outage on Friday, 1/14, between 8am-1pm PST, some services may be impacted. A line drawing of the Internet Archive headquarters building façade.
